

ASM Aerosol-Service AG

Quality control services

In our established analytical laboratory we have various HPLC and GC equipment.

ASM offers the following services:

- Release analysis:
 - Raw materials according to Ph. EUR and USP
 - Intermediate products
 - Read-to-use products
 - Packaging materials
- In process monitoring
- Analytical method development and validation (ICH Q2)
- Organisation and implementation of stability studies (ICH Q1)
- Documentation (CoA, registration etc.)

All analysis for pharmaceutical products comply with the valid GMP guidelines as well as ICH, FDA and EMA guidelines.

To complete the range of services provided in our portfolio ASM works together with external laboratories.
